

## **LCMS Technician**

Hesperos, Inc., the Human-on-a-Chip® company, is searching for an LCMS Technician to perform liquid chromatography/mass spectroscopy to aid in the development of our Human-on-a-Chip® devices. Will work under the supervision of the Analytical Chemistry lab to perform sample preparation and operate analytical equipment. This important role will directly contribute to our mission of accelerating drug discovery and reducing animal testing in the pharmaceutical, cosmetic, and food industries

### **Responsibilities:**

- Performs sample preparation including solid phase extraction, protein precipitation and dilutions.
- Operates analytical instrumentation to quantify drugs and their metabolites concentrations in biological media.
- Gathers and records data according to SOP and protocol guidelines.
- Performs maintenance operations on instruments.
- Troubleshoots instrument related malfunctions.
- Performs experiments to develop and validate methods.
- Orders supplies and maintains laboratory readiness.
- Maintains laboratory safety.
- Collects data and performs analysis to ensure quality.

### **Qualifications**

- Bachelor's degree in chemistry or related field with 1-3 years of related experience.
- Experience working in an analytical chemistry laboratory is preferred, but may train an individual motivated to learn.
- Working knowledge of analytical instrumentation such as GCMS or LCMS.
- Working knowledge of Good Laboratory Practices (GLP) considered a plus.
- Excellent oral and written communication skills.
- Working knowledge of word processing, spreadsheet, and analytical data analysis software.

### **How to Apply:**
